PRESENTATION TO SUFFOLK BUSINESS BOARD

SUFFOLK CLUSTER ANALYSIS AND FEASIBILITY STUDY

JULY 2025

AGENDA

- 1. BACKGROUND
- 2. SECTORAL AND CROSS CUTTING INSIGHTS
- 3. OPPORTUNITIES
- 4. DISCUSSION
- 5. NEXT STEPS

MEET THE TEAM

Ben Edginton-Thomas Delivery Lead

Francesca Castelo Analysis Lead

Lisa Perkins Innovation Director

Tim RobinsonChief Operating Officer

PROJECT TIMELINE

OUTCOME 1: LANDSCAPE REVIEW MAY 2025

- Inception workshop
- Desk-base review Cluster diagnostic
- Stakeholder mapping and initial engagement
- Success and prioritisation criteria agreed

DELIVERABLE(S): Landscape review report, with sectoral analysis.

OUTCOME 2: PRIORITISATION AND RECOMMENDATION JUNE 2025

- Prioritisation workshops based on sector strengths and opportunities
- Sector specific and cross-cutting opportunities identified
- Sector-specific stakeholder roundtables and 1:1s

DELIVERABLE(S): Presentation of recommended priority sectors.

OUTCOME 3: CLUSTER DEVELOPMENT PLANS JULY – SEPTEMBER 2025

- Design of prioritised cluster development plans
- Enabling requirements defined
- Targeted interviews & focus groups to validate
- Interim Presentation to the Suffolk Business Board

DELIVERABLE(S):

Presentation of emerging development plans for priority clusters.

OUTCOME 4: EXECUTION PLAN OCTOBER 2025

- Cluster plans finalised and validated through cluster mobilisation workshops
- Pilot governance board established
- Implementation planning with Suffolk Business Board

DELIVERABLE(S):

Final report and recommendations.

Implementation plan validated with business board.

SECTOR STAKEHOLDER ENGAGEMENT

Sector	Date of Roundtable	Example of stakeholders engaged (1-1 and roundtable)
ICT Digital	18 th June	BT, Space East, Cyber East, Wonde, Bravegoose, Chorus Intelligence
Advanced Manufacturing	18 th June	NAAME/Made Smarter, Hethel Innovation, Frugalpac, Sudbury Silk Mills, HF Bond
Financial and Professional Services	19 th June	FIPS, Scrutton Bland, WTW, AXA
Ports and Logistics	19 th June	MSC, ABP, Transport East, Freeport East
AgriFood and Drink	20 th June	Muntons, Suffolk Food Hall, Suffolk Agricultural Association, British Sugar
Clean Energy	24 th June	Opergy Group, Orbis Energy, Sizewell C, Insight Energy,
Cross-sector	30 th June	British Business Bank, Innovate UK, Connected Innovation, Oxford Innovation, Districts and Boroughs, University of Suffolk, Orbital Group

One-to-one calls with businesses are ongoing and targeted engagements will continue to take place throughout Outcome 3 to inform the Cluster Development Plans.

INGREDIENTS OF AN INNOVATION CLUSTER

CONVENING

MISSION

A higher order goal, clearly agreed by key stakeholders and easily communicable.

PURPOSE

Clear outcomes for economic growth, social prosperity, environmental sustainability and technology transfer.

LEADERSHIP

Building direction and support from respected actors that work together in pursuit of shared goals.

MEASUREMENT

Relentless focus on the outcomes with indicators that matter, to drive performance and generate impact.

×

EOPLE

SKILLS

A strong skills and talent pipeline, which is developed and aligned to current and future capability gaps.

DIVERSITY

Drawing groups from different backgrounds, specialisms and sectors to collectively solve problems.

NETWORKS

Interconnection with adjacent networks (physical and virtual) providing complementary value.

INFLUENCE

Influence with key stakeholders to unlock progress, inspiring reform and policy innovation.

×

INVESTMENT

Funding infrastructure, programmes, product development, company growth.

INFRASTRUCTURE

Compelling physical facilities which draw innovators to participate.

PRODUCTS

Trials and labs that prove viability; creation and management of intellectual property.

CUSTOMERS

Are identified, ready, willing and able to buy the products that the cluster offers.

SECTOR OVERVIEWS

AGRI-FOOD & DRINK

KEY INSIGHTS:

- Suffolk must define a long-term mission for its agri-food system, building on high productivity potential and growing global demand.
- Strategic opportunities include: import substitution, high-value exports, use of AI and robotics in precision farming, and branding around low-carbon food.
- Constraints include labour shortages, digital connectivity, planning and water access.
- A Suffolk 'Food Valley' model could adapt lessons from Lincolnshire, supported by Adastral as a potential agritech testbed.

PORTS & LOGISTICS

KEY INSIGHTS:

- Suffolk has UK biggest ports for container traffic and agriculture products, and a significant port for offshore energy but lacks a coordinated cluster strategy.
- Opportunity to develop a Smart Logistics Hub, leveraging Freeport (Industrial Strategy Zone) status, electric/rail logistics models, and use of Digital & ICT technologies for improved efficiency and resilience.
- Anchor organisations from ports and shipping show appetite for involvement.
- Sector constrained by skills (e.g. HGVs), infrastructure (Orwell Bridge, rail), and visibility in national policy.

CLEAN ENERGY

KEY INSIGHTS:

- Suffolk's comparative advantage lies not only in energy volume and diversity (Sizewell C, offshore wind, solar) but in becoming a hub for smart, secure energy systems.
- Core opportunity is convergence of energy, ICT and ACT: grid optimisation, cybersecurity, and AI-enabled load balancing.
- Cluster leadership could link infrastructure (generation, grid), services (O&M), and skills (construction, logistics).

SECTOR OVERVIEWS

ICT & DIGITAL

KEY INSIGHTS:

- Suffolk should position ICT both as a cross-cutting enabler, as well as a standalone sector.
- Adastral Park and Innovation Martlesham are national assets in secure networking and telecoms (ACT).
- Applications span energy load balancing, Al for ports, and satellite data for agriculture.
- A digital spine strategy could support all flagship clusters.

ADVANCED MANUFACTURING

KEY INSIGHTS:

- Advanced manufacturing is not a flagship cluster but plays an **enabling role** in other sectors (e.g. agritech, clean energy).
- Challenges include skills shortages, loss of trained staff to larger firms, and ageing workforce.
- Opportunity to align with clean energy and food processing investments where local suppliers can add value.

FINANCIAL SERVICES

KEY INSIGHTS:

- Sector lacks scale or leadership for a full cluster approach.
- Most activity in corporates is in back-office functions; innovation-led growth as per Norwich's emerging InsurTech cluster unlikely.
- FinTech activity is small-scale but growing.
- Possible wider finance triangle (Ipswich– Bury–Norwich) or enabling finance for agrifood and logistics scale-up.

2

LEADING THE SMART COUNTRYSIDE REVOLUTION

SMART LOGISTICS, SMARTER PLACES

Clean Energy × AI × Grid Infrastructure

Position Suffolk as the UK's clean energy engine by integrating offshore wind, nuclear, hydrogen and decentralised energy assets with Al-enabled grid optimisation, smart energy logistics, and next-generation O&M systems.

AgriTech × Al × Satellite × Immersive

Make Suffolk a national testbed for hightech, sustainable rural economies by converging AI, satellite monitoring, and immersive training to transform agriculture, land use, and water resilience. **Logistics** × **Simulation** × **Connectivity**

Transform Suffolk into the UK's most connected logistics corridor through innovative use of ICT and Digital technologies for efficiency, resilience and disruption modelling, electrified multimodal freight, and port-based logistics innovation.

SHAPING THE OPPORTUNITIES TOGETHER

- Do you agree with the top three 'missions'?
- Do you agree with the priority clusters?
- Taken together, will these express Suffolk's differentiation, including in funding proposals?
- Given the desire to focus on big bets, are there crucial elements missing from the top three?
- Is there anything else that we need to consider? (e.g. assets, stakeholders, enablers, blockers)
- Is there anything that worries you?
- Does this excite you?

NEXT STEPS

- Commence design of cluster development plans for approved priority sectors
- Co-design with stakeholders we will undertake targeted engagement of stakeholders to develop the plans and ensure alignment with local and national priorities
- ➤ Deliver Social Value roundtable how can we harness clusters to drive wider social value for communities and places in Suffolk? How can we ensure cluster growth is EPIC?

SUPPORTING THE WORK

- Mission sponsor help us shape the cluster development plans in line with the EPIC framework. Help us champion the missions to your networks.
- Inform the work if you have any further feedback on the work,
 we would love to schedule an opportunity to discuss.
- Stakeholder engagement help us make sure the cluster development plans are co-designed with stakeholders by:
 - Sharing the project with relevant sector representatives or allies in your network
 - ➤ Let us know any further stakeholders we should engage with.

APPENDIX

POWERING THE UK'S GREEN TRANSITION FROM THE COAST OUTWARDS

Theme: Clean Energy \times Al \times Grid

Infrastructure

Mission:

Position Suffolk as the UK's clean energy engine by integrating offshore wind, nuclear, and decentralised energy assets with AI-enabled grid optimisation, smart energy logistics, and next-generation O&M systems.

- OrbisEnergy innovation activity
- Grid balancing + telecoms logic via Adastral Park
- Hydrogen production for ports/agriculture
- Energy-smart ports and data centres
- Integration with workforce planning and digital skills

LEADING THE SMART COUNTRYSIDE REVOLUTION

Theme: AgriTech \times Al \times Satellite \times

Immersive

Mission:

Make Suffolk a national testbed for high-tech, sustainable rural economies by converging AI, satellite monitoring, and immersive training to transform agriculture, land use, and water resilience.

- Precision farming using AI + satellite data
- Smart irrigation + flood management
- Immersive rural upskilling platforms
- Data-enabled biodiversity & soil carbon modelling Position Suffolk as the UK's clean energy engine by integrating offshore wind, nuclear, and decentralised energy assets with AI-enabled grid optimisation, smart energy logistics, and next-generation O&M systems.

CONNECTED SUFFOLK: A NATIONAL TESTBED

Theme: Clusters × Infrastructure × Digital Testbeds

Mission:

Create a unified regional ecosystem of testbeds and shared infrastructure linking Suffolk's major innovation assets to enable real-world experimentation across energy, agrifood, logistics, and telecoms.

- Gateway 14, Adastral Park, Freeport East, OrbisEnergy
- Multi-sector R&D and demonstrator environments
- Interoperable data infrastructure and testbed access
- Common procurement and innovation governance

BUILDING THE FUTURE WORKFORCE WITH IMMERSIVE, INCLUSIVE TECH

Theme: Immersive \times Education \times AME \times Care

Mission:

Redesign Suffolk's skills pipeline using immersive technologies and modular digital tools to enable inclusive, crosssector workforce development in response to automation, decarbonisation, and demographic change.

- VR/AR deployed for care, manufacturing, logistics and net zero trades
- Work-based learning including modular courses and apprenticeships
- Al tutors and digital coaching tools
- Skills access for rural and underserved learners

FROM THE COAST TO THE COSMOS: ENVIRONMENT DATA

Theme: Satellite \times Marine \times Al \times

Climate

Mission:

Make Suffolk the UK's leader in digital environmental intelligence by combining marine science, climate data, and space tech to inform landsea planning, biodiversity, resilience, and policy innovation.

- Digital Ocean Twin platform
- Real-time climate/flood monitoring
- Maritime emissions and coastal erosion tracking
- Al for ecosystem modelling and policy simulation

Theme: AME \times AI \times Net Zero

Mission:

Reboot Suffolk's manufacturing sector as a digitally enabled, clean growth industry through AI-driven productivity tools, low-carbon supply chains, and cross-sector design capabilities.

- Predictive maintenance + quality control via Al
- Low-carbon industrial zones tied to Freeport/logistics
- AME skills pipelines linked to renewables and agrifood
- Partnerships with FE/HE and space for R&D prototyping

FINTECH FOR REAL-WORLD TRANSFORMATION

Theme: Finance × Infrastructure ×

Procurement

Mission:

Develop Suffolk's financial and legal services into a platform for enabling clean growth, infrastructure investment, and SME innovation through smarter digital finance tools and procurement reform.

- SME finance platforms for energy + construction
- Procurement consortia models
- RegTech for compliance-heavy sectors (e.g. logistics, agri)
- A14/A140 FinTech corridor anchored in Ipswich + Norwich

CIRCULAR SUFFOLK: CLEAN INDUSTRY BY DESIGN

Theme: Energy × Construction × Resource Efficiency

Mission:

Build the foundations of a circular industrial economy in Suffolk by linking energy, materials, and planning policy to support decarbonised construction and closed-loop resource flows.

- Waste heat and energy reuse (e.g. Sizewell \rightarrow agri)
- Circular design in Freeport and Gateway 14 developments
- Low-carbon housing + industrial retrofit pilots
- Al for lifecycle materials planning and embodied carbon

COASTAL CATALYSTS: LOWESTOFT AS A MARITIME INNOVATION HUB

Theme: Ports × Marine × Clean Tech

Mission:

Redefine Lowestoft as a multi-sector coastal innovation zone, combining offshore wind O&M, clean marine logistics, fisheries science, and digital skills to drive jobs, investment and regeneration.

- CEFAS + O&M convergence activity
- Integration of maritime with clean logistics and skills
- Innovation placemaking strategy for Lowestoft
- Exploration of Lowestoft as dual-use hub for defence + renewables

SMART LOGISTICS, SMARTER PLACES

Theme: Logistics × Simulation ×

Connectivity

Mission:

Transform Suffolk into the UK's most connected logistics corridor through digital twin modelling, electrified multimodal freight, and port-based logistics innovation.

- Wider use of Digital & ICT for efficiency, resilience and disruption planning
- Simulation of supply chain resilience (Orwell Bridge, Ely etc.)
- Smart Logistics Hub to develop and test new innovative solutions
 - HGV electrification
 - Microhubs
 - Al route scheduling
 - Reduction in empty mile journey
